# ABOUT OUR FOAM & FILLING

When we started foam+labs we had a unique opportunity to do things right. The idea was to design and manufacture superior comfort products right here in Atlanta, Georgia. We wanted to be a part of the revitalization of the American manufacturing tradition and to create products using the highest quality fillings and fabrics.

One of the defining qualities of foam+labs is our foam. Our furniture-grade polyurethane foam is made in America and is the perfect density to provide support while still remaining responsive and comfortable. Our

solid foam products are cut from large blocks of polyurethane which leaves us with excess foam trimmings. We shred these polyurethane foam trimmings, diverting them from the landfill, and use them to fill our bean bags. This process allows us to create furniture that is both supremely comfortable and

environmentally responsible.

We also offer bean bag products that feature a more traditional bead filling. Our expanded polystyrene (EPS) beads are lightweight and small in size to provide support in a variety of positions by conforming to the body. We only use “virgin” polystyrene in our bead filled products to ensure that foam+labs bean bags are

always of the highest quality.

For many of our furniture pieces we use our revolutionary vacuum compression process to “shrink” the entire product down for shipping. This process can allow us to ship

an entire sofa coast to coast for pennies on the dollar. Also, the smaller sized packages means more pieces can go out of the factory per pallet cutting down on our environmental impact.

**FOAM + LABS USES THE FINEST GRADE MATERIALS TO DELIVER HIGH-QUALITY PRODUCTS THAT WITHSTAND THE TEST OF TIME**

OUR FOAM

## ABOUT THE LINER

- Poly-nylon liner fits inside a fabric cover
- Allows the fabric cover to be removed for cleaning while keeping the filling safely inside
  - Moisture resistant
  - Tear resistant
- Includes breakaway child-proof zipper
